Everybody's smile still looks the same
No matter where you are or where you're from
It brightens up the universe, it warms the bitter soul
And brings us all together now as one

We can do it if we try, just open your heart
You might see another point of view
You might drop your judgement, see the world a tapestry
And all the possibility for you

It's not the hardest thing for you to do, so

Chorus
Smile why don't you smile
You'll find the shadows can't keep out the light
When you smile, just like a child
You send the darkest demons into flight

From China to the Middle East
From Amsterdam to Rome
From sea to shining sea from east to west
Listen to the children when they play their playing blind
The sound of their ringing laughter is the best

We have got a lot to learn, just look at how they trust
A new friend is a gift to earn today
They pick where they left it off, they aren't bothered much
So grab a ball and let's go out and play
Listen to the words the words the children say, when they say

Chorus
Smile why don't you smile
You'll find the shadows can't keep out the light
When you smile, just like a child
You send the darkest demons into flight
You'll banish all your sorrow into night
When you smile you'll see that everything's all right
